

TSBIE Admission Flow QA Test Plan

Project Overview

This plan covers a black-box review of the TSBIE admission journey with focus on navigation, download behavior, completion steps, and mobile usability.

Scope

Homepage admission CTA visibility.

Admission page navigation.

Download link behavior.

Upload / submit / instruction availability.

Responsive layout and general UX observations.

Approach

Inputs used: supplied test case workbook, user-shared screenshots, and live public page text verification.

Exit Criteria

All test cases are executed and major findings are captured in bug and summary reports.

Evidence Overview

01_homepage_admission_visible.png

Homepage Evidence

Admission CTA is visible on the landing page.

PASS

01

Homepage banner shows the admission journey starting point.

02

Admission button is visible and appears clickable to the user.

03

Primary navigation works as the first step of the flow.

Source basis: user-provided homepage screenshot and live content verification from tgbie.in.

02_admission_page_opened.png

Admission Page Opened

Admission page opens after clicking the Admission button.

PASS

01

Navigation from homepage to Admission page succeeds.

02

Admission page headline and download CTA are present.

03

This confirms the first redirect is functional before the flow breaks.

Source basis: user-provided admission page screenshot and page text verification.
