

TSBIE QA Test Summary Report

Executive Summary

Total cases: 12. Passed: 3. Failed: 7. Needs Improvement: 2. Pass percentage: 25.0%.

Quality Assessment

Navigation into the admission page works, but the overall admission journey is incomplete and not ready for a dependable end-to-end user flow.

Top Defects

No upload option.

No submit action.

Missing instructions.

Broken external download destination.

Mobile layout concerns.

Recommendation

Fix the end-to-end journey before public promotion of the admission flow.

Evidence Overview

03_no_upload_option.png

Missing Upload Option

No upload control is visible on the admission page.

FAIL

01 The page exposes a single download call-to-action.

02 There is no file upload field, browse button, or drag-and-drop zone.

03 Users cannot upload their completed form back into the system.

Defect proof aligned to TC03.

04_no_submit_button.png

No Submit Action

The admission page does not offer a submission endpoint.

FAIL

01 No submit button is displayed on the page.

02 There is no alternate action such as 'Apply', 'Continue', or 'Finish'.

03 The workflow stops before a user can complete the admission journey.

Defect proof aligned to TC04.

05_no_instructions.png

Instructions Missing

Users are not guided on what to do after downloading the form.

FAIL

- 01 The page lacks step-by-step instructions around required documents or submission method.
- 02 There is no clear explanation of offline vs online processing.
- 03 The absence of guidance increases confusion and abandonment risk.

Defect proof aligned to TC05.

06_broken_download_flow.png

Broken Admission Flow

The flow breaks after the download stage.

FAIL

- 01 Downloading the form is the only meaningful action exposed.
- 02 No next-step messaging, upload action, or confirmation state follows the download.
- 03 End-to-end admission completion is not possible from the tested pages alone.

Defect proof aligned to TC06 and TC07.
